

ATLAS 142L DRYBAG

The Atlas Bag by Northern Diver: Engineered for the demands of military professionals, ensuring your gear remains protected and secure in the toughest conditions.

Key Features:

- **Rugged Durability:** The Atlas Bag is constructed from 1000D TPU coated polyester, ensuring superior durability and resistance to harsh environments. Ideal for military applications where robustness is paramount.
- **Waterproof Performance:** Featuring a state-of-the-art Aquaseal Zip 4350676/TS and fully welded internal seams, this bag is fully waterproof, protecting your gear from water ingress.
- **Large Capacity:** With a volume of 142 litres, the Atlas Bag provides ample space for all your essential equipment. Its wing-shaped design at the top allows for a larger opening, facilitating easy access to your gear.
- **Enhanced Portability:** The shoulder straps are designed with padded panels and mesh lining for comfort during prolonged carrying. Daisy-chain webbing offers additional attachment points for extra gear, enhancing the bag's versatility.
- **Organisation and Security:** Internal compression straps keep your kit securely in place, while the internal zip pocket (30cm x 20cm) provides additional storage for smaller items. An external clear plastic pocket (9cm x 7cm) is perfect for ID or quick-access items.
- **Convenient Features:** The inflation/deflation valve ensures the bag can be easily packed down when not in use or adjusted for buoyancy when necessary.
