

THERMICORE

3 PIECE UNDERSUIT

The Thermicore V2 three piece thermal undersuit system comprises a jersey top, long johns and our ergonomically designed Hotsox.

The system is suitable for diving in moderate to cold conditions (depending on the user's tolerance to the cold), with plenty of useful features worked into the design too.

Thumb stirrups at the reinforced cuffs keep the undersuit's arms in place when fitting your wrists through drysuit seals. At the feet, foot stirrups keep the long johns in place when diving. The same three-needle reinforcement is present at the ankles and the neck too.

The suit is completed with a durable outer, extra-protective overprinting and a super soft inner lining

FEATURES

- Durable outer shell
- 1 layer super-soft fleece interior lining
- Seams are flatlock stitched
- Super-soft fleece comfort collar
- Integrated foot stirrups
- Elasticated adjustable waistband
- Elastic thumb stirrups
- Abrasion resistant overprinting
- Low profile sock seams
- Supplied with drawstring carry bag

It's well-known that when diving, some feel the cold much more than others. Depending on the depth that you go to and the time of year in which you are diving, temperature also fluctuates. With this in mind, we have developed the Thermicore Sub Zero, a thicker version of the Thermicore.

MATERIAL COMPOSITION

- Inner Lining 230G
- 100% polyester
- Outer Lining 300G
- 95% nylon, 5% spandex

TOG RATING

0.6

SIZES

S, M, ML, L, LR, LT, XL, XXL, XXXL
