RBL WIRE LANYARD

This ladder has been developed for boarding low-sided ships with bollards. This development of the Rigid Boarding Ladder is for quick deployment onto a vessel without a hand rail.

The ladder has a height adjustable quick release stainless steel cable, which can be positioned at different points on the ladder depending on the target height. Once the cable is hooked over a bollard, it provides a rigid anchor point on the target.

RBL WIRE LANYARD

2.4 m x 25 cm x 35 cm
(7.8 ft x 9.8 in x 13.7 in)

Aluminium

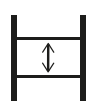

6.50 kg
(14.33 lbs)

Matt black
powder coat

Rung:
450 kg (992 lbs)

280 mm
(11.02 in)
