

PRO-SAFE RESCUE BOOT

The PRO-Safe boot is Northern Divers latest generation of water safety boot. This boot provides exceptional comfort, control, grip and protection in water and on land. Featuring a Freelock fast lace system and wide opening makes the process of donning super quick and easy saving time in crucial emergency's when time is against you.

Composite mid-sole and toe protection keep the weight of the boots very low. A double protective material layer along the front and sides of the boot help withstand knocks and sharp objects from puncturing or scraping the boots.
