

Incursion OTS Full Face Mask Adapter

FEATURES:

- Two part EPDM injection moulded and CNC machined for perfect fit to OTS Guardian mask.
- Quickly and easily fitted to the OTS mask, providing a tight and secure fit.
- Option available to include full DSV, including DSV adaptation for FFM, sealing the water clearance pip.

DESCRIPTION

Full face mask adapter for the OTS Guardian mask. To fit the adapter to an Incursion military rebreather, the dive technician removes the 3 hex button head screws from around the mouthpiece and fits the adapter in its place. The technician should also reverse the barrel in the DSV to eliminate the pip: to prevent water ingress into the full face mask when the breathing loop is shut. This fitment takes ten minutes per DSV.

The adapter is available prefitted to a DSV, complete with the water clearance pip reversed. This option provides both breathing hoses with the DSV, so the adapter need only be clipped into the OTS mask, and into the rebreather, taking seconds to perform.

ORDERING

Model number – **OSEL-OTS-Guardian Mask Adapter for Incursion-(DSV)**

Cost Option: DSV if adapter shall include whole DSV and hoses.
