

DENIM HOTWATER SUIT

Manufactured from heavy duty denim, and including double stitched seams, the Denim Hotwater has a condensed pipe circuit (non-flat) and a looser fit than its neoprene counterpart.

The suit has the same anodised aluminium water distribution valve. The pipe circuit covers the back, legs and arms of the suit. A unique heavy anodized aluminium water distribution valve, with its unique 360 degree stainless steel quick connector.

The water flows along an anti-kink rubber pipe profile, designed by, and unique to, Northern Diver.

FEATURES

- Hard-wearing denim build
- Adjustable hook and loop fastening straps on wrists and ankles
- 2 large bellows pockets with drainage holes
- Reflective strips on both upper arms

SIZES

S, M, ML, L, LT, XL & XXL
